## ABOUT WENGER

Wenger was founded in Delémont in the famous Swiss Jura in 1893. The company's success has always been based on a passion for innovation, precision and outstanding craftsmanship – the most well-known Wenger product is definitely the genuine Swiss Army Knife. Today, the company produces around 250 different versions of its famous pocket knife as well as butcher and professional kitchen knives, which are known and valued around the world.

In 1997, the company Wenger Watch SA was founded in the Swiss watch stronghold of Biel/Bienne. In only 15 years, Swiss watches manufactured by Wenger have earned an excellent reputation for reliability, multi-functionality and performance.

Over the last eight years, Wenger has been forming relationships with a few carefully selected market leaders who have been producing Wenger-branded products which incorporate the features of the world-famous Swiss pocket knife in additional product segments, such as footwear, tents, backpacks, sleeping bags, computer cases and travel equipment.

## WENGER SQUADRON

The **WENGER SQUADRON** is a timepiece dedicated to the search and rescue squadron pilots worldwide, who are always prepared to assist the unfortunate active outdoor aficionados who find themselves off course or in even worse predicaments. These airmen rely on their timepiece for accurate and legible time-keeping, dead-reckoning navigation as well as a host of other related time keeping factors of importance, such as stop watch, countdown or elapsed mission time.

The **WENGER SQUADRON** is available in two technical executions, chronograph and GMT, which are fitted with a unidirectional rotating bezel, allowing the wearer to gauge elapsed time or mark the next change of heading. The chronograph version of this refined quartz timepiece offers functions which are highlighted in red, such as the start and stop pusher, which is equipped with a red ring. The chronograph functions measure 60 seconds, 30 minutes and 12 hours. The GMT version allows globetrotters to keep track of time at their «home base», thanks to the inner 24 hour scale, which provides a second time zone.

All versions of the **WENGER SQUADRON** are assembled with Superluminova covered markers and hands for enhanced night visibility.

Worn by professionals during engagement as well as by discerning civilians during work or leisure, the **WENGER SQUADRON** is a symbol of Swiss reliability, durability and stunning leading edge design.
